shortcuts to favorite websites and run programs" - "Transform your desktop with animated desktop icons" This is a Windows application. It should work on all version of windows starting from Windows 2000, Windows XP, Windows Vista and Windows 7. It might not work on other operating systems like Mac. The problem is that the D-UP icon becomes a tiny white dot, but I remember I had a similar problem with XBMC. It's just a glitch, it wasn't a crash or anything. I just pressed the button and it worked again... @Messyworks I've heard of something called iGetNow.com or

for the tips! This is what I'm talking about. After a while the shortcut becomes a black dot, but everything's fine again. I finally installed it and after I did, I had to restart my computer because the shortcut became a black dot. It's really weird, it's like the shortcut is trying to create the shortcut in the desktop folder, which it isn't allowed. The shortcut is to the desktop folder where the "spaceshortcut.exe" and "spaceshortcut.txt" are located. Is there a way to fix this? @Awesomebeast This is the shortcut I added in the
