# VCDGear Console

[Download](#)

The VCDGear console supports various tools for playback of VCDs. This is a cross-platform installation for Windows (32 and 64 bit). The last update was made on 09-14-2008 and the changelog contains the following information: [changelog] - Fixed to display the package sources, when they were saved by a previous installation. - Added two buttons on the VCDGear icon to change the Pause/Play and Stop/Start. - Fixed, VCDGear icon was shown for an unknown file. The download link ( was down for a while. A snapshot can be found here: VCDGear-2.8.zip Extract the archive to any folder of your choice, and double-click the VCDGear.exe to run it. There is a instruction how to use the included tools: VCDGear\_info.txt Note: VCDGear will 'preload' the libraries and thus may take a little time to startup, depending on the computer, memory and network speed. The VCDGear was designed to be a full featured suite. There is a lot of tools for all kind of VCDs, DVDs and even Audio CD. If you want to have a try, just download it. (Did you ever need to convert a VCD to MPEG? - The basic VCDGear tools are to slow for video conversion). Tools Audio Tools: - Audio CD to Audio file - Audio CD to Audio CD - Audio CD to CD image - Audio CD to VCD - Audio file to VCD - Audio file to Audio file - CD Audio file to audio CD - DVD Audio file to Audio CD - VCD Audio file to audio CD - Audio CD to PCM (audio in internal, uncompressed format, using coreaudio) - Audio CD to PCM (as above) - PCM to Audio file - PCM to Audio CD - PCM to VCD - DVD Audio to PCM (audio in internal, uncompressed format, using coreaudio) - Audio CD to PCM (as above) - PCM to Audio file - PCM to Audio CD - PCM to VCD -

- Executable - Speed optimization: both 32 and 64 bits versions - Automatic detection of VideoCD images - Support for VideoCD image sizes: [2K]640x480 - Support for all audio tracks - Improved MPEG Audio/Video support - Optional [Super]VideoCD support - VideoCD image file format icon - Unicode support - Command line argument parser - Support for multiple input and output videos - Support for [File]Seed - Fixed DTS volume detection - Optional support for multiple threads VCDGear Console Usage % cd Sys/bin % make %./VCDGear % make install Conclusions VCDGear was developed to convert and correct error filled MPEG streams to High Quality VideoCDs which can then be used by your favorite media player. VCDGear.exe is highly popular and is available for MS Windows. VCDGear is not only software to convert VideoCDs but also build DVD/Blu-Ray menus. Sample Output Files Supported Software VCDGear supports more than 40 different MPEG, SVCD, AC3 and DTS audio codecs and does automatic error correction (RFE) on MPEG streams. Trump's presidency has been a one-way road of self-sabotage, and the G7 leaders are sick of it. Vladimir Putin is, on the other hand, enjoying watching Trump destroy his reputation, as well as that of the current American Administration. Meanwhile, the post-election "conversations" between

(this information was copied from the source page, more details can be found at: VCDGear Console currently supports: Image file format: VCD 2.0 Image file size: up to 15GB Video frame rate: any standard frame rate (up to 29.97fps) Note: VCDGear Console only supports decompressing VCDs made by Philips, Matsushita, Sony, Panasonic, Philips HDTV, Philips DVD, and Sega Dreamcast. VCDGear Console does NOT support the following formats: VCD 3.0, R-VCD, VLSI VCD and VCDS (requires extra software) At the moment we are working on: support for capturing VCDs from Philips DVD support for capturing DVD-RAM Supports DVD-Video, DVD-Audio, DVD-GOP, DVD-Screen Disc, DVD-Menu and DVD-R/RW discs. VCDGear Console can also handle PC MSCD, MSCR and MDS image files. VCDGear Console features: - Extract video and audio MPEG video streams from any VideoCD image - Convert VideoCD to MPEG - Convert VideoCD to VCD - Convert MPEG to VideoCD - Convert MPEG to VCD - Correct MPEG errors - Write new VCD/DVD-RW file - Create (Super)VideoCD - Create MPEG TMN (Blank Video) - Create (Super)VideoCD or (Super)VCD - Create (Super)VCD/DVD-RW discs - Write new-link (DVD-Link) file - Supports Chapter linking - Re-coding option. Allows the user to convert a DVD file to DVD-VCD/DVD-RTG/DVD-PRG/VCD/VCD-VLSI/VCD-GOP/VCD-DCAM/VCD-RC-S2/VCD-ATV - Supports Arbitrary subtitles and Music tracks. - Ability to read VCD/DVD link files - High level language: multi-platform C code - Supports user-defined Output folder structure - Fast decompression - User-defined output folder structure - Options: user-defined audio/video settings - User-defined audio settings - User-defined video settings -

#### What's New In?

VCDGear was written to be an all-in-one, easy to use, video coder. VCDGear will convert VideoCDs to standard video streams that can be played in almost all common video players. You can convert VideoCDs to unencrypted AVI/OGG streams to play them in any web browser. By using a VideoCD, you can not only save bandwidth by transferring fewer bytes, but also improve the audio/visual quality of your VideoCDs (CDs created by the UltraCD program). If you want, you can batch convert your VideoCDs to VCD on your hard drive with the VIDEOCD.EXE or create a super video CD. It is designed to be a simple and powerful CD image encoder and decoder with the ability to correct the CRC errors of all video streams found on both unencrypted and encrypted VCDs, and I have been informed that it can correct other errors as well (for more information see VCDGear FAQ). VideoCDGear Features: 1. The VCDGear GUI allows you to check what will be converted, extract, correct, batch encode, convert, and burn VCD image and SuperVideoCD. 2. You can add your own VDIFF files (contains a list of VideoCDTrack# & TrackName), VCD videos (contains a list of VideoCDFile & FileName) and/or a list of your saved CD images (contains a list of WavPack2Files & WavPack2FileName), 3. You can configure and control it using command line console. 4. You can choose to include the (Super)Video CD inside a custom.VCD image, so you can have a customized (Super)Video CD. 5. You can configure to correctly encode CRC errors in all video streams found on encrypted VCDs. 6. You can use the UNISUREHEADER or the preset version. 7. You can burn the VCD image on a default media (like VCD, CD, DVD-RW) or on a user-specified media. 8. You can specify which audio and video streams will be embedded into the VCD image. 9. You

---

can capture the entered text commands to scriptable commands and exports the entered text to \*.BAT

**System Requirements:**

**Minimum: OS: Windows XP SP2, Windows Vista SP2, Windows 7 SP1, Windows 8, Windows 8.1 and Windows 10 Processor: Pentium 4/500MHz, Celeron/800MHz, or Core2/1000MHz Memory: 256MB RAM Graphics: 1024x768, or higher (OPTIONAL) Hard Drive: 20GB available space Sound Card: DirectX 9-compatible sound card, MIDI interface, or a modem that supports SIO Additional Notes: Requires direct sound**
